The countdown is running

The development procedures adopted at the start of 2004 for the Bugatti Veyron 16.4 are on schedule.

The development procedures adopted at the start of 2004 for the Bugatti Veyron 16.4 are on schedule. Four exceptional sports cars are still involved in endurance test runs and fine-tuning. In parallel, production of pre-run models has begun at the studio in Molsheim, France. Start of production of the pilot lot is planned for the beginning of May. The relevant processes are ready for the start of production.

g = gravitational acceleration m/s2
